Professional Summary

A Software Engineering student specialized in Backend Development through ALX Africa, where I completed a certification in backend engineering. I also have strong frontend development skills and am currently enhancing my expertise in backend systems and data engineering.

I hold an Honours degree in Psychology, which strengthens my analytical thinking, problem-solving, and human-centered approach to software design. I am passionate about building scalable systems, APIs, and data-driven applications while continuously improving my backend and data engineering capabilities.

Backend Development (Specialization)

- RESTful API Development
- Authentication & Authorization
- Client-Server Architecture
- System Design Fundamentals
- Backend Optimization (in progress)

Frontend Development

- HTML
- CSS
- JavaScript
- Responsive Design
- Bootstrap

Data Engineering (Learning & Growing)

- ETL (Extract, Transform, Load) concepts
- Data cleaning & transformation
- SQL-based data handling
- Structured & semi-structured data (JSON)
- Data pipelines fundamentals

Programming Languages

Python, Java, JavaScript, C, R

Databases

MySQL, SQL, NoSQL, Redis

Tools & Technologies

Git, GitHub, Linux, Docker basics, VS Code, IntelliJ IDEA

Software Engineering Concepts

Data Structures, Algorithms, OOP, Testing, Debugging

Education

WeThinkCode-
Software Engineering (2025 - Present)

University of South Africa (UNISA)
Bachelor of Arts Honours in Psychology (2024 -2025)

ALX Africa
Software Engineering(Backend Specialisation) 2023 - 2025

University of Limpopo, Polokwane
Bachelor of Arts (Criminology & Psychology) 2018 – 2021

Certifications

- **FNB -** Full Stack Development (2025)
- **Momentum Metropolita**n - Financial Education (2023)

Volunteering

Bono Foundation — Mentor

📍 Limpopo
📅 2020 – Present

- Mentored Grade 12 learners through academic planning, goal setting, and structured learning support.
- Assisted students in improving critical thinking, problem-solving, and study strategy development.
- Communicated complex concepts in a clear and supportive manner.
- Demonstrated leadership, accountability, adaptability, leadership, and interpersonal effectiveness.
- Supported learners in building confidence, discipline, and performance improvement.

Project Experience

Personal Website Development

- Designed and developed a personal website using HTML, CSS, and Python
- Applied structured planning and organization skills in project execution

Full-Stack Application (Solo Project)

- Independently developed an end-to-end application
- Strengthened problem-solving, planning, and self-management skills

Team-Based Development Project

- Collaborated in a team environment to deliver a shared project
- Developed teamwork, communication, and coordination skills

CAREER OBJECTIVE

To grow as a backend or data engineer where I can build scalable systems, design efficient APIs, and contribute to data-driven applications while continuously improving my backend and data engineering skills.

Languages

- English (Fluent), Tshivenda (Native) & Sepedi (Intermediate)
